DETAILED ACTION

Preliminary Amendment

1. Preliminary amendment filed on 11/19/03 has been entered.

Drawings

2. Drawings filed on 8/19/03 have been approved by the Examiner.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 11/24/03, the information disclosure statement is being considered by the examiner.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1- 31 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1- 49 of U.S. Patent No. US. 7,139,808 B2.

Although the conflicting claims are not identical, they are not patentably distinct from each other because each of the limitations of the instant application is defined by the claims of the copending application. In particular, claim 1 of the patent application includes each of the limitations of claim 1 of the instant application. While the patent application claim includes additional limitations not specifically recited by the claim of the instant application, the use of the transitional term "comprising" in the instant claim fails to preclude the possibility of additional features or elements. Therefore, the invention defined by claim 1 of the instant application is not patentably distinct from the invention defined in claim 1 of the patent application. Similarly claims 2, 12 and 24 of the instant application includes each of the limitations of claim 6 of the patent application. Similarly claims 3, 13 and 25 of the instant application includes each of the limitations of claim 3 of the patent application. Similarly claims 4, 14 and 26 of the instant application includes each of the limitations of claim 2 of the patent application. Similarly claims 5, 15 and 27 of the instant application includes each of the limitations of claim 12 of the patent application. Similarly claims 6, 16, 17 and 28 of the instant application includes each of the limitations of claim 7 of the patent application. Similarly claims 7 and 31 of the instant application includes each of the limitations of claim 13 of the patent application. Similarly claim 8 of the instant application includes each of the limitations of claim 14 of the patent application. Similarly claims 9, 21 and 29 of the instant application includes each of the limitations of claim 17 of the patent application. Similarly claims 10, 18, 19, 22 and 30 of the instant application includes each of the limitations of claim 13 of the patent application. Similarly claim 11 of the instant

application includes each of the limitations of claim 1 of the patent application. Similarly claim 20 of the instant application includes each of the limitations of claim 23 of the patent application. Similarly claim 23 of the instant application includes each of the limitations of claim 45 of the patent application.
